Databases: MongoDB, MySQL

Experience

Open-Source Contributor – Hacktoberfest 2024

1st October 2024 – 31st October 2024

DigitalOcean, GitHub, Open-Source Community

- Contributed to open-source projects like **Ambuflow**, **VigyBag** by fixing bugs, improving documentation, and adding new features.
- Successfully merged 8 pull requests as part of Hacktoberfest 2024.

Projects

AI-Powered Resume & Career Assistant — *ReactJS, NextJS, Tailwind CSS, OpenAI API, MongoDB* 🔄

- Built an **AI-powered resume analyzer** that provides **ATS score**, **smart fix suggestions**, and **AI-generated cover letters**.
- Implemented **industry-specific resume templates** to improve **job application success rates**.
- Developed an interactive AI chatbot to offer **real-time career advice and resume feedback**.

Matrix AI Network – AI-Powered Blockchain Platform — *React.js, Tailwind CSS, Framer Motion, Node.js, MongoDB* 🔄

- Developed a **futuristic AI-powered website** showcasing **Matrix AI Network's capabilities in blockchain scalability, security, and AI-driven smart contracts**.
- Designed an engaging **homepage with animations**, an interactive **roadmap section**, and a **dark mode toggle** for better accessibility.
- Implemented **SEO optimization** to improve discoverability and integrated a **contact form with social media links** for community engagement.
- Ensured **full responsiveness** across devices and deployed on **Netlify** for a seamless user experience.

Technical Achievements

Flipkart Grid 6.0 — Competed in a national-level software development challenge.

Google Solution Challenge 2025 — Participating in GDSC's global competition to build solutions using Google technologies.
